## OVERVIEW

ISAIC [ai-zey-ihk] - Industry Sandbox & AI Computing - is a cloud service provider specializing in AI/ML infrastructure, offering customizable GPU, CPU, virtual machines, storage, Kubernetes, and pre-configured environments.

Our mission is to empower businesses with tailored, high-performance computing solutions while providing personalized support and expertise. We differentiate ourselves by combining advanced technology, specialized AI/ML software stack, and a commitment to client success.

*"What makes ISAIC different is the ease of scalability. PulseMedica doesn't invest in the hardware themselves, and thus does not bear the financial and upfront cost of hardware purchase, maintenance, and evergreening."*

## KEY BENEFITS

- 1 Secure and local resources, housed at the University of Alberta.
- 2 NVIDIA GPUs, Kubernetes, PyTorch, TensorFlow, Keras, and more.
- 3 Clients keep their Intellectual Property and no complex contracts.
- 4 Exceptional customer service and a dedicated support team of experts.
- 5 Clear and competitive pricing without egress fees, and on-demand service.

## OFFERINGS

### CPUs

High-end AMD and Intel CPUs, ideal for General purpose computation, simulation, and HPC programming

### GPUs

Provides a wide range of GPUs from the latest Ampere and Tesla families to Nvidia.

### AI/ML Focused Solutions

Pre-configured environments tailored to AI/ML projects with access to virtual machines and storage solutions.

### LLM Offerings

Access to UI and API of cutting-edge open-source Large Language Models like Llama2 and mistral in private servers.

## PARTNERS
